

I have been an XM Satellite Radio subscriber since the beginning of their broadcasts. I feel that having XM is a great benefit to me, both here at home in New Mexico and while I am traveling in other parts of the country. Commercial radio in New Mexico is not very good... and I love the wide choices that satellite provides. In addition, I take my XM unit with me when I travel to other states and recently was able to get local traffic and weather while in Tampa.

I urge the FCC to reject the NAB's petition # 04 - 160.

I think that satellite radio should be allowed to provide programming services that their customers want (and are willing to pay for); and not be restricted in their product offerings by the National Association of Broadcasters.
